► Mobile classroom in Ministry project

BD SENSORS will administrate the Tour for the Future - Mobile Classroom project for the Ministry of Industry and Trade.

With a mobile classroom, we go around 35 cities and towns all over the country.

The program is intended for 8th and 9th grade students. One class will be divided into halves, first of every one will teach technology in a mobile classroom, the second half will be career guidance.

Topics: modern technologies for schools - especially 3D printing and 3D technologies. The pneumatics will also be presented at 2 workplaces.

Name of the Career Counseling Program: "I am looking for a profession that suits me well."
