

## ► TV reportage

On Friday, March 5, after lunch, the ČT staff arrived at our company and filmed a short report on testing employees on Covid-19.

The report will be on air on the same day at 6 pm in the regional news of the Czech Television. It is also available in the news archive.

The event can be also spotted on our social networks.

## ► DataFly at schools

We have already presented our IoT solution in one of the previous issues of the News. We are now testing DataFly in practice.

Example of use: air monitoring in primary school classrooms, where when the concentration of CO<sub>2</sub> is increased, the system warns the teacher that he should ventilate the classroom.
