► Program Corporate students and our new colleagues

Thanks to the cooperation with VISC, the **Corporate students program** has been operating successfully in our country for a long time, which significantly supports secondary school students and connects theory with practice. After successfully passing the final exams, the **participating students join us as the company employees.**

This year, several Corporate students have expanded our work lines. We have one at the mechanical workshop this school year. Furthermore, our second new colleague Martin F. after successfully graduating joined BD SENSORS as a regular employee.

We also have a former intern at the purchasing department (VOŠ and OA UHD) Bc. Lukáš K., who is now employed on a part-time basis, and continues to study at university. In September, Omar W. (VOŠ and OA UHD) in the research and development department was also briefly in practice.
