► Successful start of the Solar Orbiter mission

On Monday, February 10, 2020, the Atlas V 411 rocket was successfully launched from Cape Canaveral, Florida, which launched the Solar Orbiter spacecraft. As previously written in the last issue of the News, the spacecraft will examine the Sun's inner heliosphere. This is a huge success for all Czech companies that have joined the project. BD SENSORS participated in it through the CSRC division by developing and manufacturing some components.

► Vernissage in the Senate

On Tuesday, February 4, 2020, a traveling vernissage entitled "Brno in Space" took place in the Senate of the Parliament of the Czech Republic. Only a few companies operating in South Moravia, which develop or manufacture technologies under the European Space Agency, participated. And one of these companies was BD SENSORS CSRC. This is an excellent presentation of our Space Division!
