

Dear Partners,

with the present communication we would like to officially inform you about the successful outcome of the ASL Breadboard Acceptance Review (BAR), being in date 18/12/2014 at the customer European Space Agency (ESA) ESTEC premises and meaning the positive end of the Phase I of the Airbag for Small Lander (ASL) Project.

Many thanks to all of you for the excellent work performed in the last 9 months and the efficient cooperation we established, factors that highly contributed to achieve the challenging goals we had.

Please find hereafter few pictures of some of the manufactured hardware, as implemented in the most significant System-level Functional Tests (Packing, Inflation and Retraction).

Looking forward to walk with you through the next steps....hopefully to the final landing on Mars!!

The Aero Sekur ASL Team
